COORDINATING COMMITTEE

MEMORANDUM BY THE GERMAN DELEGATION

CONCERNING THE REVISION OF ITEM 1523

The German delegation have the honour to inform the committee of the following: during the last list revision the committee failed to reach an agreement on the redefinition of item 1523.

However, some simple improvements were agreed upon during these discussions although these agreements have not been finalized by an amendment sheet:

1. The cut-off in sub-item (a) was to be increased from 16 to 36 Kc/s.
2. In the heading and towards the end of sub-item(a) the word "line" was to be deleted.

The discussion on the subject is recorded in COCOM DOC 3715.23/2B.

The German delegation propose to issue an amendment sheet on 1523 taking care of the two changes mentioned above and accepted during the list review.

The German delegation would appreciate to have the view of the committee on the proposal stated above at an early opportunity.
